A Hybrid Doctoral Workshop on a Journey of Becoming a Researcher

24th October 2024

Venue of the Event: *The 30 Laboratories Building*

Chaired by Prof Chamseddine LAMRI & Dr Wafa ZEKRI

“Not everyone can have mind of a researcher”, a statement we heard in the past that dulled the competence of developing an inquisitive mind in us. Research can be a choice empowered by willingness and passion. Writing is a fundamental skill in research, when you start writing you know that you are doing research. However, writing about the ‘what’ in research is not enough, novice researchers often seek guidance to develop writing about the ‘how’ and the ‘why’. Hence, the aim of this workshop is to build a community of research engaged by doctoral students to share their research journeys endorsed with specific metacognitive learning strategies that help them construct their academic identity. Furthermore, this workshop supports doctoral students to oversee research as a lifestyle, helping them to develop inquiry-based thinking skills which promote for self-directed learning, and widen up horizons for research beyond a specific context.

We invite **Doctoral students** to send abstracts of 70-80 words with titles that raise research challenges, researchers’ changes and perspectives to zek.wafaa@hotmail.com or to lamrichamseddine@yahoo.fr before October 12th, 2024.

Areas that can be discussed in this workshop, but are not limited to:

RESEARCH AND PUBLICATION	RESEARCH AND TECHNOLOGY	DISSERTATION WRITING
Discussing writing for research publication (research journals: articles, chapters, reviews) Writing & ethics. Ethics & AI writing.	Research on online libraries and databases. Writing assistance software. Research management tools. Plagiarism writing tools. Writing & AI	Writing block. Writing methodologies Research and mental stamina Research diaries& timelines Research as a career Research milestones
